

HRMS Module

Employee Master

- Adding employees basic details (Name ,DOJ, DOB , Designation , Department , Contact Info , PP details , Emirates ID)
- Should be able to assign line manager for approval (department tree)
- Should show bank details (IBAN , Bank), WPS or not labour card (But should not be editable from this module)
- Status of employee (Resigned , termination or on leave)
- Should be able to search employees by name , designation , department or EMPID)
- EMPID generates in sequence.
- Once employee created it should be removable
 - Alter Bank Details
 - Alter Salary Detail
 - Resignation or termination
 - Alter Department or line manager

Leave Management

- Leave Master (Very important , should be able to control leaves , allocation , max leave , leave opening balance , leave criteria , with pay or with pay)
- Should be able to view leave balance as on date
- Able to view updated leaves (but cant edit , edit only accessible for super admin).
- Leave request should come for L2 approval, once approved then it should be posted
- Should be able to view kind of leaves separately (Emergency , unpaid annual leave)
- Leave reports (leave balance as on date , leave monthly report , or date wise report)
- Max cap for leave is 60 , so when the maturity hits 60 it should not calculate above that.

ESS Portal

- In Ess employees will have separate login id and password which will generate when employee is created in employee master
- They will be able to view their leave balance , leave request , payslip (month wise auto generated)
- And any other request

Hr Dashboard with basic details

We will have separate report section (we will have template for all we need to input the data only (crystalSAP))
